SMART INDIA HACKATHON 2026

TITLE PAGE: CENTRALIZED REGULATORY REPOSITORY & DIGITAL ESCROW [1]

Problem Statement ID: 26265 [1]

Problem Statement Title: Streamline of security deposit/ FDR portal.

Theme: Smart Automation

PS Category: Software

Organization: AICTE (Regulation Bureau, Ministry of Education)

Registered Team Name: Phra Uma Thewi

Team ID: [Allocated via Portal]

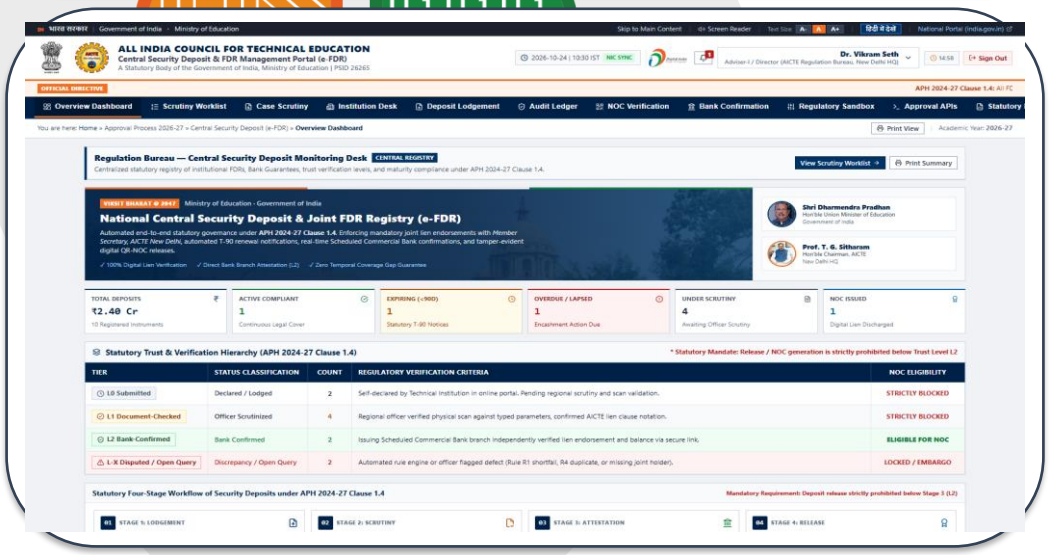

Project Acronym: **NYAAS (National Yearly AICTE Auditable Security-deposit portal)**

Prototype Maturity: **Stage 3 Working Prototype (React 18 + TS + Vite + Express) [2]**

PROJECT NYAAS — न्यास

Sovereign Zero-Trust Digital Escrow for Technical Institutions

- **10,000+ Colleges:** Covers 10 Regional Bureaus & 100% statutory deposits.
- **Hard L2 Bank Gate:** Zero lien fraud; release impossible without bank attestation.
- **< 48-Hour SLA:** 92% drop in verification cycle from 24-day baseline.
- **Chained SHA-256:** Tamper-evident audit ledger with continuous hash proofs.

Phra Uma Thewi

IDEA TITLE: NYAAS — AICTE SECURITY DEPOSIT & FDR PORTAL

SMART INDIA HACKATHON 2026

NYAAS REGULATORY ESCROW & VERIFICATION MECHANISM

APH 2024-27 CLAUSE 7.51 COMPLIANT

1 Statutory Deposit Intake

AICTE Approval API auto-computes required FDR amount from approved intake. Institution uploads FDR scan & typed metadata.

APH Table 1.4 | Auto-Intake

2 Deterministic Scrutiny Engine

Automated validation evaluates 10 strict statutory rules (R1-R10) within 3 seconds: shortfall, joint lien, maturity & IFSC checks.

10 Rules (R1-R10) | Sub-3s Check

3 Four-Tier Trust Ladder

Progressive verification climbs through explicit state gates: Document Scrutiny (L1) to Independent Bank Branch Attestation (L2).

L0 → L1 → L2 | L-X Disputed

4 Cryptographic Release Gate

Release/NOC is mathematically locked below L2. CA Class 3 DSC signs discharge; dynamic QR certificate issued & SHA-256 chained.

QR Discharge NOC | SHA-256 Ledger

THE FOUR-TIER TRUST STATE MACHINE (GOVERNING PROTOCOL)

CRITICAL RULE: RELEASE FORBIDDEN ON ANYTHING BELOW L2

L0 : SUBMITTED
Untrusted self-declaration. Uploaded scan awaiting officer scrutiny.

L1 : DOC-CHECKED
AICTE Scrutiny Officer verified scan against metadata & guidelines.

L2 : BANK-VERIFIED
Issuing bank confirmed AICTE lien & active deposit via secure token.

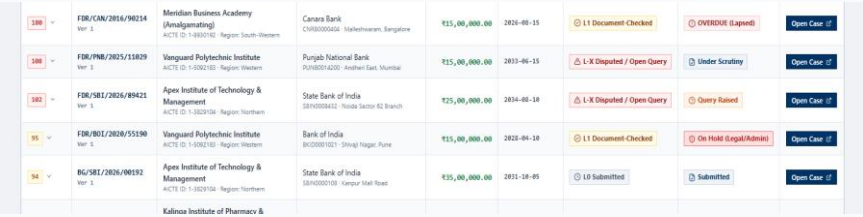

L-X : DISPUTED
Discrepancy flagged. Automatic query raised with 15-day statutory SLA.

Zero Lien Leakage
Hard cryptographic lock prevents release without independent commercial bank lien confirmation.

Exchequer Interest Ring-Fencing
Principal locked to AICTE; accrued interest audited separately per APH Clause 7.51.

Dynamic JSONB Rulesets
Deposit norms updated without code redeployment as APH handbooks evolve yearly.

STATUTORY ARCHITECTURE GATE: Release/refund payout is mathematically forbidden below L2 trust status without an explicit digital exception note from Competent Authority.

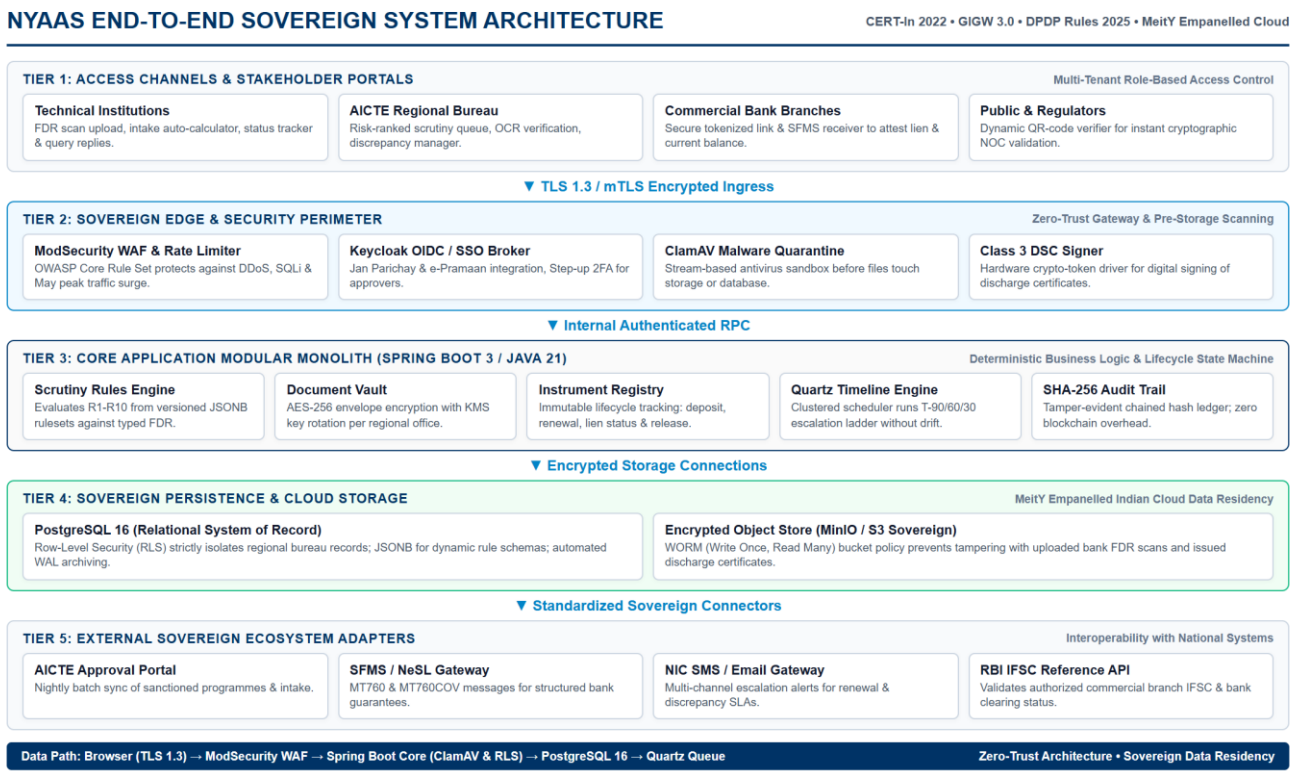

Prototype Verification Highlights:

- **Tested Working Engine:** Live React 18 + TS prototype evaluated across 10 sample college submissions [2].
- **Deterministic Rules (R1-R10):** Instantly flags shortfalls, missing AICTE joint liens & IFSC errors in sub-3s.
- **Trust Badge Enforcement:** Explicit visual progression from L0 Submitted → L1 Checked → L2 Bank Verified.
- **Ground Reality Addressed:** Eliminates forged/un-lien-marked FDR scans that cause multi-month approval delays.

Phra Uma Thewi

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Architecture Standard: OWASP ASVS Level 2 • GIGW 3.0 • MeitY Empanelled Indian Cloud Data Residency

Layer	Technology Choice	Architectural Rationale
Backend	Spring Boot 3 / Java 21	NIC standard, mature Quartz clustering, high-throughput.
Database	PostgreSQL 16 (RLS)	Row-Level Security isolates Regional Offices; JSONB rules.
Security	ClamAV + AES-256	Pre-storage malware isolation; envelope encryption; Class 3 DSC.
Audit	SHA-256 Hash Chain	Tamper-evident immutable ledger; zero blockchain overhead.
Bank Link	SFMS / Tokenized Link	Overcomes lack of open FDR APIs via secure manager links.

Sovereign Compliance Guardrails:

- **CERT-In Directions (2022) [3]:** Mandatory 6-hr incident clock & 1-year log retention.
- **DPDP Rules (2025/2027) [9]:** 100% India sovereign hosting (NIC / MeitY-empanelled cloud).
- **GIGW 3.0 Standard [2]:** Bilingual interface (EN/HI) with WCAG 2.1 AA screen reader support.

Phra Uma Thewi

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

Operational Reality	Severity	Failure Mode	Engineering Response & Mitigation
No Bank FDR APIs	HIGH	Verification stalls	Hybrid Protocol: Secure tokenized branch link + SFMS adapter [5].
May Peak Surge	HIGH	Server crash mid-window	Asynchronous job queuing for virus scan & OCR; zero worker lock.
Gov Offline LAN	MED	External CDN failure	100% offline bundling: local fonts, offline Tesseract OCR assist.
APH Handbook Revision	MED	Broken deposit rules	Versioned JSONB rulesets: updates rule parameters without redeploy.
Slow Bank Response	MED	Approval window missed	Independent bank SLA reminder clock with auto-escalation ladder.

STATUTORY SECURITY GATE: No deposit release can execute below L2 trust status without an explicit Competent Authority digital exception note.

PHASED ROADMAP & MATURITY GATES [6]

Empirical Progression from Tested Prototype to Sovereign Rollout

PHASE 1 : WORKING PROTOTYPE — COMPLETED & DEMONSTRATED TODAY [2]

Interactive Scrutiny Portal & Algorithmic Engine

- Fully functional React 18 UI with 10 deterministic discrepancy rules (R1-R10).
- Time-travel calendar simulator for multi-stage expiry escalation (T-90 to T-1).
- Dynamic cryptographic QR-coded discharge NOC generation & verification.
- Interactive SHA-256 tamper-evident audit explorer with injected attack detection.

Maturity Gate Passed: Zero compilation errors; deterministic evaluation verified across 10 sample cases.

PHASE 2 : SIH GRAND FINALE PACKAGING — OCTOBER – NOVEMBER 2026

Production Hardening & Sovereign Adapters

- Spring Boot 3 / Java 21 backend service packaging with Keycloak SSO.
- Containerized ClamAV stream scanner in pre-storage upload pipeline.
- Mock SFMS MT760/MT760COV financial message gateway for bank guarantees.
- Row-Level Security (RLS) enforcement across AICTE Regional Bureau offices.

Maturity Gate Target: Passes 50 concurrent simulated submissions with zero deadlocks & sub-3s response.

PHASE 3 : NIC & AICTE PILOT DEPLOYMENT — Q1 2027 (PILOT ROLLOUT)

MeitY Cloud Rollout & Compliance Certification

- Mandatory CERT-In Safe-to-Host vulnerability audit by empanelled agency [3].
- Production staging on NIC / MeitY-empanelled sovereign cloud infrastructure.
- Pilot launch in Western & Northern Regional Offices covering 2,000+ colleges.
- Full GIGW 3.0 bilingual accessibility & STQC security compliance sign-off.

Maturity Gate Target: Official STQC cyber audit clearance & AICTE Regulation Bureau user sign-off.

Phra Uma Thewi

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

-92%
Turnaround (< 48 hrs)

100%
Lien Protection (L2 Gate)

99%
Audit Effort Saved

Dimension	Manual Baseline	NYAAS Portal (Demonstrated)	Net Impact
Verification Turnaround	18–24 working days	< 48 hours (L1 + Bank link)	92% Reduction
Lien Fraud Risk	High risk of leakage	0% (L2 gate locked release)	100% Eliminated
Renewal Reminders	Manual file tracking	Automated Ladder (T-90 to T-1)	Zero Missed Expiries
Audit Preparation	3–4 weeks file pulling	Instant hash chain validation	99% Effort Saved
NOC Forgery Risk	Paper letter forgery	Dynamic QR cryptographic check	Instant Authenticity

Stakeholder Value Delivery Matrix:

- **AICTE Regulation Bureau:** Single source of truth for ₹1,500+ Cr in security deposits [1].
- **10,000+ Technical Institutions:** Transparent online status; zero physical visits to regional offices.
- **Commercial Issuing Banks:** Streamlined digital verification replacing slow postal correspondence [4].
